

LA Ad 2014-05

**ADVISORY**

TO : PAO-accredited Calibration Laboratories  
SUBJECT : ILAC POLICY on the Traceability of Measurement Results  
DATE : 28 July 2014

Please be advised that the PAO is already strictly implementing the following ILAC policy document:

**ILAC P10:01/2013 ILAC Policy on the Traceability of Measurement Results**

Calibration certificate should, wherever applicable, indicate the traceability to national or international standards of measurement and should provide the measurement result and associated uncertainty of measurement.

The traceability statement will affirm that the calibration reported was conducted using standards whose value are traceable to an appropriate national, international, intrinsic, or mutual content standard.

**Traceability of Measurement statement will be "This instrument was calibrated using reference standard traceable to SI Units as maintained by the National Metrology Institute" (if directly calibrated by NMI) or "This instrument was calibrated using reference standard traceable to SI Units as maintained by the National Metrology Institute through accredited calibration laboratory" (if calibrated by accredited calibration laboratories).**

For information and strict compliance.
